Tools & Libraries:

I have experience with the following tools, libraries and languages:

Languages: Swift, Objective-C, Node.js, Javascript, HTML, CSS
Tools: Git (Github, Stash, Bitbucket, SourceTree), CocoaPods, XCode, GOCD CI, REST, Npm
Libraries: UIKit, AFNetworking, AlamoFire, XCTest

Work Experience:

YOOX NET-A-PORTER
iOS Developer

(March 2015 -)

As part of the NET-A-PORTER iOS team I work within part of the mobile team to deliver features and bug fixes in line with the current roadmap. My primary responsibilities include:

- Working in a test driven environment to develop the application using Objective C and Swift.
- Maintaining the current test infrastructure and adding further manual and automated tests as well as bug fixes to ensure the quality of each release.
- Using analytics and other tools to track the user activity and ensure releases are providing measurable value for the business.
- Ensuring constant involvement with managers and other stakeholders to ensure that business priorities are being met and that the team maintains constant communication with other parts of the business.
- I recently worked within a small group to develop the first shoppable Apple TV application

YOOX NET-A-PORTER
Graduate Software Developer

(September 2014 - March - 2015)

I began at Net-A-Porter as a graduate developer and after a six months of web development where I mainly worked on the backend of the website using

Node.js and J2EE, I worked within an Agile team with daily stand-ups and my main responsibilities and achievements during this time include:

- Creating an application to dynamically generate a number of sitemaps for different categories and product pages on the Mr Porter website using Node.js and Express.js
- Working within an Agile team maintaining a legacy J2EE website using TDD and modern best practice principles.
- Writing unit tests to contribute to the test suite within the team and being part of the release process as a manual tester.

UniWink.com
IT Intern   *(December 2013 - March 2014)*

UniWink.com is a new business start-up founded by Sarah Dineen of UCC. We believe in the power of online peer assistant and social learning for third level students. UniWink.com is a website that will allow students to access and share lecture notes and course material with other top students. As an IT intern my roles include:

- Marketing on behalf of UniWink.com in order to grow the brand within UCC and Cork.
- Managing the Facebook and Twitter page of the company to interact with users.
- Maintaining control of the database as well as entering new data via SQL
- Regularly communicating with the IT director in order to make recommendations and receive updates on the website.
- Organising competitions and sponsorship opportunities for UniWink.com
  Inputting design ideas in order to help the website reach the maximum audience possible.
